

1. Print this page twice, once for your measured floor plan and once to draw your cabinet layout after your floor plan is complete.
2. Use the graph paper below to measure and draw your kitchen floor plan using our Measuring Tutorial Guide.
3. Make sure to follow all the directions **1 thru 9** precisely and use the supplied drawing diagram for an example of what should be included in your finished drawing. **Accurate Measurements are very important!**
4. Each Square represents 6 inches, 4 squares will be 1 square foot.
